COMPOUND PRO-MAX

Properties

Ultra-abrasive polish containing micro-crystals selected for their heavy cut. Designed for very damaged paints and gelcoats, **COMPOUND PRO-MAX** is amazing at getting rid of deep scratches and pre-polishing extremely dull or heavily oxidised surfaces.

Instructions for use

Respect usual safety measures for the use of chemical products and wear the appropriate individual protection equipment.

Apply to the surface to be treated with a brush or with the polisher turned off. Work on one zone at a time. Apply on the surface to be treated until the desired result is achieved using a polisher with high density foam buffing pads.

Can also be applied by hand with a microfibre cloth. However, we recommend using the polisher.

Tip: Next, we recommend applying **NCP13 PRO-CUT**, **NCP12 PRO-MEDIUM**, **NCP11 PRO-FINE** for a perfect high-gloss, high-protection finish.

Technical specifications

Physical state: viscous **colour:** white **pH:** ca. 7 **density:** ca. 1,32

Storage: keep tightly closed and protected from cold, frost, UV rays and heat in a ventilated place.
